Staff Geologist II
Duncklee & Dunham, P.C.
Cary, North Carolina

Duncklee & Dunham, P.C. (Duncklee & Dunham) has an opening for a mid-level (i.e., 2-5 years of experience) geologist in our Cary, North Carolina office. The successful candidate will have a comprehensive range of experience in many phases of soil / groundwater assessment and remediation projects, including the implementation of soil and groundwater investigations, conducting aquifer tests, oversight of groundwater monitoring activities, screening remedial technologies, construction supervision, and construction of cost estimates and proposals. We are looking for a self-motivated candidate, capable of working as a part of a project team, who thinks clearly and objectively, and has strong technical writing skills.

Position Requirements:

- Using in-depth knowledge of geology principles and standards to produce conceptual and detailed designs for soil and groundwater investigation and remediation projects
- Using in-depth knowledge of the latest methods and procedures for proper soil and groundwater sample collection, field note taking and laboratory methods to promote and maintain best practices in the company
- Using various software including, but not limited to, Microsoft Office applications (Word®, Excel®, PowerPoint®, Project®), AutoCAD®, and AQTESOLV®
- Preparing project reports that include feasibility studies, corrective action plans, remedial action plans, remedial investigation reports, and monitoring reports
- Screening remedial alternatives, developing conceptual designs, and preparing cost estimates for soil and groundwater assessment and remediation projects
- Providing field geology support and construction management
- Supporting remediation system operations and maintenance
- Reviewing and evaluating monitoring and operations data
- Designing and implementing site characterization activities
- Developing, tracking and preserving project budgets
- Being accountable for effective time management, in accordance with project priorities and objectives

Skills / Qualifications

- A Baccalaureate or Master's Degree in Geology or Hydrogeology
- 2 to 5 years of experience in environmental consulting and/or task management in the fields of assessment and remediation projects
- P.G. registration or ability to obtain P.G. in North Carolina within 12 months
- The successful candidates must be willing to travel locally, and could travel out of area for several weeks at a time
- Current 40-hour and 8-hour OSHA Hazwoper training (40-hour OSHA 1910.120) and hazardous waste handling experience (preferred but not required)
- Must be able to perform field work with exposure to a variety of climactic conditions, and potential exposures to hazardous materials
